DETAILED ACTION

In view of applicant's response and amendment, the examiner has reconsidered his restriction requirement of the previous office action and deems the following restriction to be proper.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-17, drawn to a device and method for interpreting an immunoassay, classified in class 435, subclass 7.1.
 - II. Claims 18-21, drawn to a device and method for interpreting an agglutination test, classified in class 435, subclass 4.
 - III. Claim 31, drawn to an immunoassay device, classified in class 435, subclass 287.1.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I-III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, Groups I-III all have different components. The agglutination aspect and areas of coagulation required of Group II are not required of Groups I or III. In addition, Groups I and III differ from each other because the digitiser and multiple data processors of Group I are not required of Group III.
3. Because these inventions are distinct for the reasons given above, have acquired a separate status in the art as shown by their different classification and recognized divergent subject matter, and the search required for one group is not required of the others, restriction for examination purposes as indicated is proper.

Art Unit: 1641

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
